EDUCATION

University of Toronto St. George

Bachelor of Computer Science, Specialist Co-op Program | CGPA: 3.6/4.0

Toronto, ON

Sept 2024 – Apr 2028

EXPERIENCE

Software Engineer

Jul 2026 – Present

Velox Systems

Toronto, ON

- Sole developer on the rebuild of a landscaping contractor's production workspace, migrating its live safety-compliance app onto a FastAPI/Postgres backend and cutting authentication from Supabase to Zitadel OIDC behind a zero-error type and lint gate.
- Shipped a route-planning module that turns a 4,756-tree municipal registry into truck-days in driving order and syncs offline crew completions back to the office, retiring a 95-file legacy planner.

Full-Stack Developer, Contract

Jul 2026 – Sep 2026

Applied Optimal Inc.

Remote

- Built a 7-day trial to paid subscription system (FastAPI, Postgres, Stripe, Flutter Web) with member-count fee tiers, checkout, a reminder job, and server-side route lockout, across 4 migrations and 130 automated tests.
- Worked a Jira ticket and peer-review loop on a 3-developer team, resolving spec gaps with a non-technical client across twice-weekly syncs, restoring blocking flake8 and black CI, and clearing 77 Flutter analyzer warnings.

Software Developer, Contract

Mar 2026 – May 2026

GenLedge

Remote

- Built a **Stripe MCP server** (TypeScript, 12 tools) covering charges, invoices, subscriptions, and disputes, enabling AI accounting agents to query live payment data via the **Model Context Protocol**.
- Built a **Stripe webhook handler** that verified event authenticity and routed **12 event types** to specialized AI employee roles, generating real-time **general-ledger entries** automatically.

AI and Automation Extern

May 2025 – Aug 2025

Outamation

Remote

- Built **NLP** and **Computer Vision** (OCR) pipelines to classify and extract fields from mortgage documents, replacing a manual data-entry step on the program's sample document set.
- Improved retrieval relevance by **~25%** on a benchmark query set by tuning a **Retrieval-Augmented Generation (RAG)** system in **LlamaIndex**, iterating on chunking and custom vector embeddings.

Software QA Tester, Intern

June 2024 – Nov 2024

Chester-Hill Solutions

Remote

- Wrote automated test scripts covering **50+ user flows** across multiple environments, cutting the repetitive manual regression passes the team ran each release cycle.
- Investigated and documented defects through **API response analysis** and root-cause write-ups, giving developers clearer repro steps to turn around fixes faster.

PROJECTS

LeaseGuard | TypeScript, Next.js, Claude (MCP), Supabase pgvector, RAG

- Built an **AI agent** analyzing Ontario leases via a **12-tool MCP server (Claude Haiku 4.5)** with **hybrid BM25/vector retrieval**, returning a grounded risk report under **90 seconds** across **206 tests**.

Angler (ItsTodayMedia \$5,000 Build Challenge) | Next.js, TypeScript, Claude, Supabase, MCP

- Built a four-module **AI web app** solo in 10 days, mining competitor ads via **Apify** and extracting patterns with a **vision-language model**, then exposed it as a public **MCP server** and ran a security audit across **21 tests**.

Reflecta | Python, Typer, Gemini, Groq, Claude, pytest, AST

- Published a **Python CLI agent (reflecta, PyPI)** that finds coverage gaps and generates/repairs tests via a **multi-model routing pipeline**, lifting coverage **64%→80%** on a real service across **338 tests**.

Palate (UofTHacks 2026) | Next.js, TypeScript, MongoDB, WebAuthn, Google Gemini

- Built the **Next.js** frontend and end-to-end **passkey authentication (WebAuthn)** for a group-dining app whose **Gemini** engine turns swipe data into restaurant picks, addressing the **1Password challenge**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), Dart, Java, SQL, HTML5, CSS

Frameworks: React, Next.js, Node.js, Express.js, FastAPI, Flutter, TailwindCSS, Zustand, LlamaIndex, Redux

AI Tools: Claude Code, Claude API, Model Context Protocol (MCP), RAG, Google Gemini, Cursor

Dev Tools: Git, GitHub, Docker, PostgreSQL, Supabase, Stripe, REST APIs, OAuth 2.0, WebAuthn, CI/CD, Jira

AWARDS & CERTIFICATIONS

UofT Dean's List (2024-25, 2025-26) | J.S. McLean Scholarship | 2nd, Waterloo SAF Financial Literacy (2023) | Claude Code in Action & Building with the Claude API (Anthropic)
